General Note

Except as otherwise noted, all trade figures in this publication are compiled from publications and official records, Bureau of the Census.

The term "foreign trade" applies to trade between the United States, including its territories, and foreign countries. Trade between continental United States and its territories is referred to as "shipments". Alaska, Hawaii, Puerto Rico and since January 1, 1935, the Virgin Islands are territories. Beginning January 1, 1940, trade with foreign countries through the customs district of the Virgin Islands is not included in United States trade statistics. Figures for shipments out of the territories include small quantities to other territories. In statistics of foreign trade, forest products and distilled liquors are considered non-agricultural products.

Exports under various special economic-aid programs are included in figures appearing in this publication, but separate figures are not being compiled by the Bureau of the Census on exports under these programs. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the territories and possessions, and shipments between the territories and possessions. Excluded from the dollar value is any export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities.

In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are inter-changeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others.

Special Note

Beginning with statistics for July 1953, the Bureau of the Census has been estimating the quantity and value of \$100-\$499 export shipments from a 10-percent sample of such shipments and adding these to the full tabulation of shipments having a value of \$500 and over. The procedure is explained in the September 1953 and February 1954 issues of Foreign Trade Statistics Notes, obtainable from the Bureau of the Census, Washington 25, D. C.

Beginning with statistics for January 1954, the Bureau is estimating the quantity and value of imports under \$250 from a 5-percent sample of such imports. This procedure is explained in the February 1954 issue of Foreign Trade Statistics Notes.
